Summary

AI/ML and Data Science Engineer with hands-on experience building end-to-end predictive models, Generative AI applications, and interactive BI dashboards. Combines deep technical expertise in data analytics with strong product management principles to solve complex user problems and drive strategic, data-informed business decisions.

Education

Vellore Institute of Technology **2022 - 2027**
Integrated M.Tech in Artificial Intelligence (5-Year Program) **CGPA: 7.98**

Skills

Programming Languages: Python, SQL (MySQL)

AIML: PyTorch, TensorFlow/Keras, Hugging Face, Scikit-Learn, XGBoost, Prophet, Deep Learning (CNN/RNN/LSTM), Generative AI, LLMs, NLP, Predictive Modeling, SHAP

Analytics & Visualization: Pandas, NumPy, SciPy, Power BI, DAX, Matplotlib, Plotly, Microsoft Excel, Data Modeling, ETL

Tools & Frameworks: FastAPI, Streamlit, Git/GitHub, REST APIs, VS Code

Experience

Data Analyst Intern - S. S. Heavy Equipments Private Limited **Summer 2025**

- Engineered 5+ interactive performance reports, empowering stakeholders across 4 operations to make data-backed resource allocation decisions faster.
- Automated field data extraction by developing optimized SQL queries, eliminating 10+ hours of manual data entry per week and improving reporting accuracy.
- Identified a digital-presence gap and independently developed a prototype company website (HTML, CSS, JS), successfully pitching the digital transformation initiative to senior leadership.

Projects

AI Reward Platform | github.com | Live | Product Thinking, FastAPI, Gemini AI, Streamlit **2026**

- Architected a full-stack AI recommendation product from 0-to-1, solving the core HR problem of personalizing employee rewards across different countries, cultures, and currencies.
- Integrated Google Gemini 2.5 Flash and real-time FX APIs to generate context-aware reward suggestions and regional purchasing power comparisons across 8 global markets.
- Owned end-to-end product decisions—from problem framing and UX flow to prompt engineering and scalable backend integration—driving highly personalized user engagement.

Sales Forecaster | github.com | Live | Python, XGBoost, Prophet, Time-Series Modeling **2026**

- Engineered a robust sales forecasting system trained on 1M+ records across 1,115 retail stores to optimize inventory planning and staff scheduling.
- Benchmarked multiple architectures (Prophet, XGBoost, LSTM), successfully optimizing an XGBoost model with time-series feature engineering (lags, rolling averages) to achieve a highly accurate €385 MAE.
- Built a user-friendly Streamlit interface allowing operations managers to visualize weekly seasonality, simulate promotional impacts, and adjust horizon targets dynamically.

Global Stock Market Financial Dashboard | github.com | Power BI, DAX, Python, yfinance, MySQL **2026**

- Engineered an interactive 4-page Power BI dashboard analyzing 69 stocks across 12 sectors over a 10-year period (2016–2025) to provide business intelligence on global market trends.
- Automated data ingestion and validation workflows using Python before loading into MySQL, ensuring 100% data consistency for downstream analytics.
- Uncovered key strategic insights, including Indian industrial stock outperformance and US tech sector volatility, by developing custom DAX-driven KPIs, slicers, and visual analyses.

Extracurricular

Event Management Lead - Marathi Club, VIT **2023 - 2025**

- Orchestrated the end-to-end planning and execution of large-scale cultural events for 1,000+ attendees, managing a volunteer team of 50+ members across logistics and marketing.
- Coordinated cross-functional stakeholder communication and budgeting across 5 major events, ensuring zero execution failures and high participant satisfaction.
